Technical Indicators	This indicates whether the user has the possibility to select various technical indicators that shall be displayed.
Volume Indication	Indicates whether volumes are shown, either by figures or by a chart.
Select Timeframe	Means, that the user can set the timeframe he wants to see in the chart.
Define chart type	This specifies whether the user is able to define the chart type (e.g. bar, line, candlesticks)
	Indicates whether there exist a JavaApplet-based chart tool that allows the user to define the above mentioned
Manipulable (JavaApplet-based)	features and even more.
News Channels	Defines through which channels the user can get news:
Email	
WAP	Here the user has to use the WAP feature to get information about securities
PDA	
Streaming Video	
Ticker	= Laufschrift
SMS	The user gets information about securities via SMS
Content	Shows which type of content the user gets:
News Feed	Indicates from which resources news are rechieved
Biggest Gainers / Biggest Losers	There is information about the biggest gainers and loosers (Tops & Flops) on the site
Most Actively Traded Securities	The user gets information about the most actively traded securities.
Research & Analysis area	This indicates that the site has an extra Research & Analysis area where the user can do research on specific securities.
Complete Research Reports	Specifies that there is an area on the site where complete research reports are offered to the user. In the comment the resource is mentioned.
Analyst Recommendation (Security Tip)	Demonstrates whether analyst recommentations (security tips) can be found on the site.
Financial Calender	This specifies whether a fincancial calendar with important dates exists on the site
News organized by	The way how news can be filtered on the site:
Security/Company Name	
Sector/Industry	
Country	
Stock Indexes (Dow Jones, DAX)	Defines whether the user has the possibility to select news on stock indexes.
Special Groups (IPOs, Press releases, analysis, etc.)	Specifies whether there are other news groups according to which the news can be filtered
Alerts	Information the user gets automatically:
Delayed	Information is sent out delayed
y	

	Real-time	Information is sent out realtime
	Email	User gets alerts via eMail
	SMS	User gets alerts via SMS
	PDA	User gets alerts via PDA
	by Stock Quote	User gets alerts on quotes for the securities the user has set limits for
	for News	User gets news alerts for the securities s/he has defined
	Analyst Reports	User gets information on analyst reports for specific securities s/he has defined
	Analyst Recommendations/Ratings	User gets information about analyst recommendations/ratings for the specified securities
	IPO	User gets information on IPOs
	Index	User gets information on specific Indexes s/he has defined
	Company News	User gets company news (e.g. Consors news)
	Volume	Alert on volume of specific securities
	Daily Market Wrap-up	User gets a daily market wrap-up sent
	News Density	User gets an alert when a certain number of news is exceeded
	Alerts on real depot	User gets a daily alert on his real depot
_		
ij	General	Wathlist about delayed data
ŧ	Delayed	Watchlist shows delayed data
9	Real-time	Watchlist shows realtime data
<u> </u>	OneClick Trading	A link to the trading area exist (e.g. via BUY/SELL buttons)
ā	Quotes	The user gets an email elect on the guetes (according to the limits set)
8	Email Alert	The user gets an email alert on the quotes (according to the limits set)
Š	SMS Alert	The user gets an SMS alert on the quotes (according to the limits set)
ω̈́	PDA Alert	The user gets an PDA alert on the quotes (according to the limits set) The user can define the columns he wants to have displayed in the Watchlist (e.g. volume traded, 52 weeks
ote	Configurable parameters	high/low, etc.)
ă	Chart Link	A chart link exists in the watchlist
Ÿ	Upper and Lower Limits	The user can set limits on the quotes in the watchlist
st-	Transmission of Portfolio	
Ē	SMS Request	The user can request the portfolio of the watchlist via his cell phone
Watchlist Quotes, News and Portfolio	WAP	The user can get the portfolio of the watchlist on his cell phone via WAP
Š	PDA	The user can transfer the portfolio of the watchlist on his PDA
.0	General	
Musterdepot - Virtual Portfolio	Delayed (can add in minutes)	Watchlist shows delayed data
Ę	Real-time	Watchlist shows delayed data Watchlist shows realtime data
4	OneClick Trading	A link to the trading area exist (e.g. via BUY/SELL buttons)
<u>a</u>		The user has the possibility to track the performance of the Musterdepot. It is possible to enter no. of shares,
莡	Performance Tracking (enter no. of shares, total cost, buying date, etc.)	total cost, cost per security, buying date, etc.
>	Quotes	
ŧ	Email Alert	The user gets an email alert on the quotes (according to the limits set)
9	SMS Alert	The user gets an SMS alert on the guotes (according to the limits set)
Ē		The user can define the columns he wants to have displayed in the Musterdepot (e.g. volume traded, 52 weeks
ste	Configurable parameters	high/low, etc.)
₹	Chart Link	A link to the chart of the security exists
_	Upper and Lower Limits	The user can enter upper and lower limits for the security
	Portfolio	
	Alert - Profit Warning	The user can define an alert on the portfolio and get a profit warning in case that the predefined conditions are
	-	met Defines that the user gets a summary of the Musterdepot sent via email
	Summary sent by email	Defines that the user gets a summary of the Musterdepot sent via SMS
	Summary sent by SMS Charting	The Musterdepot can be visualized> e.g. pie chart
	-	·
	SMS Request	The user can request his Musterdepot/s via his cell phone using the SMS service
	SMS Request WAP	The user can request his Musterdepot/s via his cell phone using the SMS service The user can get information on his Musterdepot/s via his cell phone using WAP
	SMS Request	The user can request his Musterdepot/s via his cell phone using the SMS service
_ω	SMS Request WAP	The user can request his Musterdepot/s via his cell phone using the SMS service The user can get information on his Musterdepot/s via his cell phone using WAP
sloo	SMS Request WAP PDA	The user can request his Musterdepot/s via his cell phone using the SMS service The user can get information on his Musterdepot/s via his cell phone using WAP The user can transfer his Musterdepot to his PDA
